

第三次作业

1. (1) $r=4, i=80;$
 $r=6, i=70;$

$r=5, i=75$

$r=7, i=65$

(2) $i=5$

$100 - 5r = -40 + 0.25y$

$y = -20r + 560$

$r=4, y=480;$

$r=5, y=460;$

$r=6, y=440$

$r=7, y=420.$

$$2. \text{ a) } S = -50 + 0.2y$$

$$S = \bar{r}$$

$$-50 + 0.2y = 100 - 5r$$

$$y = -25r + 750$$

$$\text{b) } S = \bar{r}$$

$$-50 + 0.2y = 100 - 10r$$

$$y = -50r + 750$$

$$\text{c) } S = -50 + 0.25y$$

$$S = \bar{r}$$

$$-50 + 0.25y = 100 - 10r$$

$$y = -40r + 600$$

1) 绝对值变小

2) 绝对值变大

$$L = 0.2 \times 800 - 5 \times 10\% = 160 - 0.5 = 159.5$$

$$L = 0.2 \times 900 - 5 \times 8\% = 180 - 0.4 = 179.6$$

$$L = 0.2 \times 1000 - 5 \times 6\% = 200 - 0.3 = 199.7$$

(2) $L = m = \frac{M}{P} = 150$

$$L = 0.2Y - 5r = 150$$

$$Y = 750 + 25r$$

$$(4) L = M$$

$$0.2y - 5r = \frac{M}{P}$$

$$y = 25r + 1000$$

LM 曲线向右移动 250

$$(5) \text{ 当 } y = 1100 \text{ 时 } r = 4 < 10.$$

不均衡，利率会下降直至平衡

$$A. (1) L = M$$

$$ky - hr = \frac{M}{P}$$

$$r = \frac{k}{h}y - \frac{1}{h}\left(\frac{M}{P}\right)$$

斜率为 $\frac{k}{h}$

(2) 斜率分别为 0.02, 0.01, 0.01

(3) k 变小，斜率变小， h 增加， k 斜率变小

(4) LM 将会垂直于 x 轴的直线

$$5. 1) S = -100 + 0.2y$$

$$\hat{r} = S$$

$$-100 + 0.2y = 150 - 6r$$

$$y = -20r + 1750$$

$$L = M$$

$$0.2y - 4r = 150$$

$$y = 20r + 750$$

$$12) \quad y = -20r + 1750$$

$$y = 20r + 750$$

$$y = 950$$

$$r = 10$$

$$6. 1) \text{ 当 } r = 0.05, \quad y = 500$$

$$\Delta y = k_g \cdot \Delta g = 5 \times 5 = 25$$

$$\therefore y = 500 + 25 = 525$$

12) IS 向右平移 5.

$$7. 1) y = c + i + g$$

$$y = 800 + 0.63y + 7500 - 20000r + 7500$$

$$r = \frac{158}{200} - \frac{0.37}{20000} y$$

$$r = \frac{0.162}{10000} y - \frac{6}{10} \Rightarrow$$

$$y = 40000 = GDP$$

$$r = 0.05$$

$$\therefore C = 26000, \quad \hat{r} = 6500, \quad g = 7500$$

$$C + \hat{r} + g = 40000 = GDP$$

- C B A . C/A

二. 1. X.

~~斜率~~ → 收入.
